

*Capture your moments
in motion...*

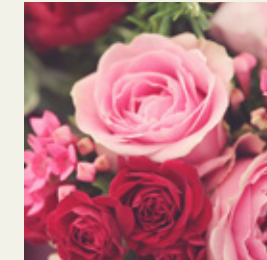

AN **EMOTIONAL** DAY, CAPTURED PERFECTLY FOR YOU TO ENJOY TIME & TIME AGAIN

Congratulations on your upcoming wedding and we are delighted that you are considering us to capture the memories of your special day.

We realise all too well how your wedding day can be over before you know it, which is why so many people choose a wedding video for them to have as a permanent memento of their special day.

With everyone having cameras on their various devices these days, getting a professional video produced is often an overlooked aspect of the day. But if the video is not done well, it is one of those things that can be a real disappointment when looked back upon in days, months or years to come.

Truly professional filming respects; form, composition, lighting, angles & artistry. All of which we practise & all of which are at the heart of Media to Motion's wedding packages. Please view the following packages to see which one best suits you and rest assured that you will have a quality, lasting film of your day for you to enjoy for years to come.
